FairWarning® Announces a New Privacy Auditing Offering for Small and Medium Care Providers

FairWarning® Small and Medium Care Providers Package provides privacy auditing financial incentives to care providers with fewer than 400 beds

ST. PETERSBURG, Fla. – August 24, 2010 – FairWarning, Inc., a leading supplier of solutions which monitor and protect patient privacy in Electronic Health Records, today announced the release of the FairWarning® Small and Medium Care Providers package for privacy breach detection. FairWarning® Small and Medium Care Providers offers the FairWarning® best-in-class privacy breach detection solution customized for smaller healthcare organizations, at a savings of up to 30%.

ARRA HITECH, HIPAA and other state and federal laws require healthcare organizations, regardless of size, to establish entity-wide privacy and security plans that will thwart, detect and report privacy breaches. Healthcare organizations are challenged to establish foundational technologies and processes to ensure compliance, patient privacy and security and effective auditing. Prior to the release of FairWarning®'s Small and Medium Care Providers package, small and midsized healthcare providers could not meet these requirements without disproportionate and substantial investment. FairWarning's Small and Medium Care Providers brings organizations with less than 400 beds a comprehensive and affordable solution.

The FairWarning® Small and Medium Care Providers package offers:

- Privacy breach detection designed for organizations with up to 400 beds*
- Streamlined implementation process
- Buy 2 application audit log sources, get 3 at no charge (up to \$14,600 value)
- Savings of up to 30%

FairWarning® privacy breach detection protects patient privacy in more than 300 hospitals and 1,400 clinics across the United States, Canada and United Kingdom. The solution includes auditing of over 100 of the most common healthcare applications, including those from McKesson, MEDITECH, Epic, Cerner, and Allscripts.

"Small and medium sized providers experience the same privacy and security challenges, and compliance requirements as our award-winning, world-class enterprise customers," says Kurt Long, founder and CEO of FairWarning®. "We are pleased to make leading patient privacy solutions accessible for small and medium organizations."
