MemorialCare® Selects FairWarning® for Enterprise Patient Privacy Auditing

MemorialCare® selects appliance based FairWarning 2.0® based on ability to consolidate wide range of healthcare audit sources and ease of deployment

ST. PETERSBURG, Fla. – October 17, 2006– FairWarning, Inc., a leading provider of security solutions for the healthcare industry, announced today that MemorialCare®, the West's second largest community hospital campus, has selected FairWarning 2.0® for enterprise patient privacy auditing and information security monitoring. MemorialCare®, based in Long Beach, Calif., is recognized as one of the top integrated healthcare systems in America (Verispan 100) and one of the most technologically advanced healthcare providers in the U.S. (Healthcare's Most Wired 100).

"By partnering with FairWarning, MemorialCare is taking a leadership role in protecting our patient's privacy," said Lynn H. Grieves, chief compliance officer of Memorial Health Services. "FairWarning's proactive privacy auditing solution improves our ability to detect potential incidents involving patient privacy as well as rapidly research potential incidents when they are reported.   MemorialCare is committed to furthering sustainable security and HIPAA compliance processes that serve our patients and our institution."

FairWarning 2.0's out-of-the-box solution affordably automates healthcare's best practices for reviewing audit logs from systems which access protected health information. FairWarning 2.0® is an appliance based solution with built-in support for audit logs from major healthcare application vendors including, but not limited to, Cerner, Eclipsys, Epic, GE, McKesson, Meditech, Misys, and Siemens. FairWarning also offers support for a healthcare organization's specific needs which can be configured through FairWarning's XML-based patent pending technology for audit log modeling.
